

ARTICLE 12 SITE PLAN REVIEW

The Zoning Administrator shall require that all applications for building permits for new buildings or expansion of any existing buildings in multifamily, commercial and industrial zoning districts be subject to Site Plan Review in accordance with these regulations. Developments shall implement the applicable regulations and requirements specified in the Zoning Regulations, shall be encouraged to implement the objectives of the City's Comprehensive Plan and to foster compatibility among land uses in the City of Moberly.

The provisions specified for site plan applications within this manual are only intended to be a summary of the requirements specified in the adopted zoning regulations for the City of Moberly. Developers should consult the applicable zoning regulations for a complete list of submittal requirements for site plan applications.

An application fee and deposit shall be paid at the time the site plan application is submitted. The deposit shall be used to cover expenses incurred by the city in the processing and review of the application. If the city's processing and review costs exceed the amount of the initial deposit, the applicant shall be required to pay the additional amount.

In order to request approval of a site plan application:

1. The applicant shall first meet with the Zoning Administrator, the Director of Public Works, the Director of Utilities, the city's planning consultant, and all other applicable city staff members to receive a complete explanation of the zoning requirement in question, the site plan application procedure and the application form and to discuss all relevant issues relating to the site plan application.
2. The applicant shall submit a completed site plan application form along with a **Digital set 2 hard copies** of the proposed site plan and payment of the appropriate application fee and deposit at least fifteen (15) days prior to the next regularly scheduled meeting of the Planning and Zoning Commission to allow adequate time for City Staff review. The Site Plan shall include data, details, and supporting plans, which are found relevant to the proposal as specified in Section 12 of the City of Moberly Zoning Regulations. The number of pages submitted will depend on the proposal's size and complexity. The applicant shall make notations explaining the reasons for any omissions. **An application shall not be processed unless it has been fully completed, the site plan submitted and the application fee and deposit paid.**
3. Site Plans shall be prepared by a registered professional engineer, architect, land surveyor or landscape architect at a scale of 1-inch equals 20 feet, on standard 24" x 36" sheets. In addition, the site plan is required to comply with all other applicable provisions of the zoning regulations. The additional provisions include, but are not limited to, Design Standards specified in Section ___ of the City of Moberly Zoning Regulations and the Landscape and Buffer Requirements specified in Section ___ of the City of Moberly Zoning Regulations.
4. Review of the site plan shall be performed by the Zoning Administrator or the city's planning consultant and submitted to the Planning and Zoning Commission for approval. The Planning and Zoning Commission shall perform their review of the site plan and staff findings at the next regularly scheduled meeting of the Planning and Zoning Commission for which the item may be scheduled and shall adjourn and reconvene as is determined necessary.

The following checklist is to be completed by the design Professional. The Site Plan shall include the following data, details and supporting information, which are found to be relevant to the proposal or and explanation as to why they are not Addresses or included All site plans shall be prepared by an architect or landscape architect registered in the State of Missouri, or by a professional engineer licensed in the State of Missouri. The number of pages submitted will depend on the proposal's size and complexity.

A.	Site Plan Content Requirements: Does the Site Plan comply with or show the following?	<u>Yes</u>	<u>No</u>
1.	Name and address of the owner of record, developer, and seal of the engineer, architect or landscape architect.	_____	_____
2.	Name and address of all owners of record of abutting parcels.	_____	_____
3.	All existing lot lines, easements, and rights-of-way. Include area in acres or square feet, abutting land uses and structures.	_____	_____
4.	The location and use of all existing and proposed buildings and structures within the development, including all dimensions of height and floor area, show all exterior entrances and all anticipated future additions and alterations, and typical elevations and building materials.	_____	_____

	<u>Yes</u>	<u>No</u>
5. The location of all present and proposed public and private ways, driveways, sidewalks, ramps, curbs and fences. Location type and screening details for all waste disposal containers shall also be shown.	_____	_____
6. The location of required parking areas including parking stalls, setbacks and loading and service areas.	_____	_____
7. The location, height, intensity, and bulb type (e.g., fluorescent, sodium incandescent) of all external lighting fixtures. The direction of illumination and methods to eliminate glare onto adjoining properties.	_____	_____
8. The location, height, size, materials, and design of all proposed signage.	_____	_____
9. A landscape plan showing all existing open space, trees forest cover and water sources, and all proposed changes to these features including the size and type of plant material. Water sources will include ponds, lakes, brooks, streams, wetlands, flood plains, and drainage retention areas.	_____	_____
10. The location of all existing and proposed utility systems including:		
a. Sewer lines and manholes;	_____	_____
b. Water lines and fire hydrants;	_____	_____
c. Telephone, cable and electrical systems; and	_____	_____
d. Storm drainage system including existing and proposed drain lines, culverts, catch basins, head walls, end walls, hydrants, manholes, and drainage swells.	_____	_____
11. Plans to prevent the pollution of surface or groundwater, the erosion of soil both during and after construction, excessive run-off, excessive raising or lowering of the water table, and flooding of other properties, as applicable.	_____	_____
12. Existing and proposed topography shown at not more than two-foot contour intervals. All elevation shall refer to United States Geodetic Survey (U.S.G.S.) datum. No building shall be located in the 100-year flood plain.	_____	_____

		<u>Yes</u>	<u>No</u>
13.	Existing and proposed zoning district boundaries adjacent to the site's perimeter shall be drawn and identified on the plan.	_____	_____
14.	Traffic flow patterns within the site, entrances and exits, loading and unloading areas, curb cuts on the site and within 100 feet of the site.	_____	_____
15.	A detailed traffic study for mixed use and multi-tenant developments, or for developments in heavy traffic areas, if required by the Zoning Administrator, to include:		
a.	The projected number of motor vehicle trips to enter or exit the site, estimated for daily and peak hour traffic level.	_____	_____
b.	The projected traffic flow pattern including vehicular movements at all major intersections likely to be affected by the proposed use of the site; and	_____	_____
c.	The impact of this traffic upon existing abutting public and private ways in relation to existing road capacities. Existing and proposed daily and peak hour traffic levels, as well as road capacity levels, shall also be given.	_____	_____
B.	Design Standards:		
1.	Does the building rooftop have at least two of the following features: Parapets concealing flat roofs and roof top equipment; overhanging eaves; sloped roofs; and three or more roof slope planes?	_____	_____
2.	Are roof mounted equipment, including ventilators and satellite dishes, screened from view (100 percent opacity) or isolated so as to not be visible from ground level of any adjacent public thorough-fare or residentially-zoned area, up to a maximum of 300 feet away and is the appearance of the roof screens coordinated with the building to maintain a unified appearance?	_____	_____
3.	Are all electrical and mechanical equipment located adjacent to the building and visible from any adjacent public thoroughfare or residentially-zoned area screened from view (100 percent opacity), up to a maximum of 300 feet away and are such screens and enclosures treated as integral elements of the buildings appearance?	_____	_____

	<u>Yes</u>	<u>No</u>
4. Except for meters, electric and telephone service pedestals, transformers, three-phase feeder lines, subtransmission and transmission lines (34.5kv and above), electrical substations and such other facilities as the utility may deem necessary to install utilizing "overhead" type construction, are all telephone and cable television lines, electrical services and distribution lines placed underground?	_____	_____
5. Are all gas meters in any front yards, located within three feet of the building foundation?	_____	_____
6. Is the form and proportion of buildings consistent or compatible with the scale, form and proportion of existing development in the immediate area?	_____	_____
7. Pedestrian access shall be an integral part of the overall design of each multifamily, commercial, and industrial development.		
a. Does the pedestrian access provide safe and convenient access to and from off-street parking areas?	_____	_____
b. Does the pedestrian access connect with abutting properties and developments so as to create an alternative means of transportation for residents of the city?	_____	_____
c. Are sidewalks at least 5 feet in width provided along all sides of a lot abutting a dedicated public or private street?	_____	_____
d. Is there a continuous internal pedestrian sidewalk provided from the perimeter public sidewalk to the principal customer entrance(s)?	_____	_____
e. Does the internal sidewalk feature landscaping, benches, and other such materials and facilities for no less than 50 percent of its length?	_____	_____
f. Are sidewalks provided along the full length of the building along any facade featuring a customer entrance and along any facade abutting a public parking areas?	_____	_____

		<u>Yes</u>	<u>No</u>
g.	Are sidewalks located at least five feet away from the building facade to provide planting areas for landscaping along the foundation of the building?	_____	_____
h.	Are internal pedestrian sidewalks distinguished from driving surfaces through the use of special pavers, bricks, or scored concrete to enhance pedestrian safety and the attractiveness of the sidewalks?	_____	_____
8.	Architectural design should create visual interest through the use of different textures, complementary colors, shadow lines and contrasting shapes.		
a.	Will the buildings have a variation of detail, form, and siting to provide visual interest?	_____	_____
b.	Are loading docks, trash enclosures, outdoor storage and similar facilities and functions incorporated into the over-all design of the building and the landscaping so that the visual and acoustic impacts of these functions are reduced to as great an extent as possible and are out of view from adjacent properties and public streets?	_____	_____
c.	Do building facades 100 feet or greater in length incorporate recesses and projections along at least 20 percent of the length of the building facade?	_____	_____
d.	Do windows, awnings, and arcades total at least 60 percent of the facade length abutting any public street?	_____	_____
e.	Does any building facade 100 feet or greater in length abutting a residential district, have an earth berm of at least six feet in height installed between the building facade and the abutting residential district and is the earth berm landscaped with evergreen trees at intervals of at least 20 feet on center, or in clusters?	_____	_____
9.	Minimum Exterior Building Material Standards: Does a minimum of 50% of each exterior wall consist of one or more of the following materials?:		
a.	Masonry: Masonry construction, which includes solid cavity faced or veneered-wall construction, or similar materials.	_____	_____
b.	Glass Walls: Glass walls shall include glass curtain walls or glass block construction.	_____	_____

	<u>Yes</u>	<u>No</u>
c. Wood other than exposed plywood paneling.	_____	_____
d. Concrete finish or pre-cast concrete panel (tilt wall) that has exposed aggregate, hammered, sandblasted or covered with a cement-based acrylic coating.	_____	_____
e. Metal panels with a depth of one inch or more; or a thickness of U.S. Standard 26 gauge or more.	_____	_____
